- Half heavy duty.
- Built-in control box.

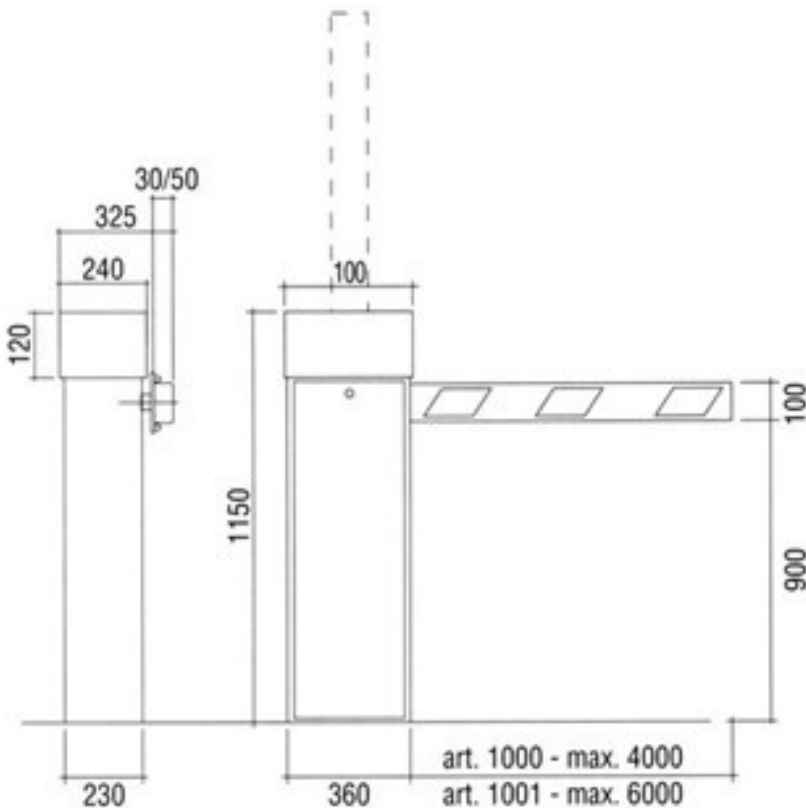

Description

The barrier produced by DEA SYSTEM may be left-hand or right-hand thanks to its system composed by easily invertible levels. The three levers equipped bar block protects the motor against vandalism acts. A built-in limit switch allows sharp bar adjustment the emergency release on the motor allows the opening of the bar if necessary. STOP is available in two versions: 4 meters and 6 meters. The barriers are provided with fixing plate and control box.

Item 1000: 4 meters barrier

Item 1001: 6 meters barrier
